## WEATHER DISCUSSION:

Fire Weather Forecast for Western MT & N Central ID NWS Missoula 231 PM MDT SAT JUN 27 2015

### DISCUSSION...

The heat continues with record high temperatures across the Pacific Northwest and northern Rockies this weekend. Humidity recoveries in many locations have only been into the 30s and 40s, which will continue through tomorrow morning. Some improvement in humidity is expected Sunday night into Monday as a very wet air mass causes thunderstorms and much more cloud cover. Recent trends in the forecast suggest the Flathead, eastern Lolo, and Beaverhead-Deerlodge forests will have the most thunderstorm coverage and lightning. In the long term, temperatures will remain 10 to 15 degrees above average at least with the accompanying thermal belts.

### Precipitation Summary as of 6/27/2015 @ 14:00

## Area Discussion:

MIDC continues processing miscellaneous orders to AK, CA, OR, and WA. Activity is picking up in the Northern Rockies as ERC's continue to climb. Make sure your fire qualifications are current and your status is correct in ROSS.

As far as Northern Rockies activity, MIDC is mobilizing one T2IA crew and the Lolo IHC to a new start (Blue) on the Clearwater-Nezperce NF near Dixie, Idaho.

GAR responded to 1 railroad fire today as MRL continues eastward grinding rails. MSO responded to 2 new human starts. Both were oversized campfires, one of them escaped its ring. No other activity reported today.

The MCFPA has elevated the Fire Danger Rating in Missoula County to **VERY HIGH** effective 3 p.m., June 22<sup>nd</sup>, 2015. Outdoor burning remains CLOSED in Missoula County, effective 12:01 a.m., June 16<sup>th</sup>, 2015.

## Historic Heat Wave this Weekend

Western Montana and Central Idaho

### Hot Facts

Kalispell all time record high for June is 96°F

Missoula has only hit 100°F two times in June

Butte has only been over 95°F once in June

Grangeville all time record high for June is 98°F

# EXTREME HEAT SAFETY CHECKLIST

---

- 1 BE INFORMED:** Check your local forecast and keep up to date on the severity and duration of a heat wave. Information is key!
- 2 LIMIT OUTDOOR ACTIVITY:** Limit or avoid strenuous outdoor activity if you can! Take more breaks, wear light colored clothing if you have to be outdoors, and stay out of any direct sunlight.
- 3 HYDRATE, HYDRATE, HYDRATE:** Drink more water than usual to stay hydrated no matter where you (even *before* you feel thirsty).
- 4 CHECK ON OTHERS:** Young children and the elderly are most at risk from extreme heat-related illnesses. Check on those in most need of assistance during extreme heat. Do not leave children unattended in vehicles!
- 5 CHECK ON ANIMALS:** Your furry friends need help too! Make sure they have shade, water, and NEVER leave them unattended in a vehicle – EVEN with the windows cracked.

**REMEMBER!** Heat is the #1 weather-related killer.  
Ensure you and those around you are safe during this time!
